Merlin - a Quality
of Life saver.

Having lost my husband
15 years ago, after 45 years
of marriage, I thought this
was the end. However, 8
years ago the diagnosis
of macular degeneration was

made. Within one year I was legally blind. Now
the end, for sure.

With the help of friends and excellent professional
help, I purchased a black and white CCT. Thus, I
could read and write. 3 years ago, I purchased my color Merlin.

Being a dog trainer doing private lessons at home
and classes 3 times a year, doing Pet Therapy for 10
nursing homes, the Merlin, along with talking books,
has allowed me to keep up with current developments.

3 years ago I began volunteering for Guideposts
Prayerline. These activities are so rewarding and I
thank God I can still take part.

Thank you, Enhanced Vision for making this possible.

(over)

Last year I was diagnosed with multiple myeloma ^{2/2}
again, my Merlin allows me to keep up with research
and treatment for this disease

I just hope and pray that the Good Lord will allow me
to continue to be active and pursue my missions in life and
also equipment such as you provide will enhance a "good
quality of life".

It has been said "a dog trainer never dies, they just
drop on recall." So be it.
